

Star 8 MonoFlexi Solar

Star 8 MonoFlexi panels are the ultimate in lightweight, flexible, mono-crystalline solar. Constructed with highly efficient solar cells supported in a unique polymer, the panels have no metal backing and no glass components which allows for flexibility and significant weight reduction.

Available in a range of sizes from 100 watts, MonoFlexi is perfect for camping or marine applications. You can now have solar power when and where you want it. It just makes sense.
