

Solar Lights

The Star 8 Solar Street Light integrates a solar panel, LED lamp and the Li-Fe battery into a single product. With its low energy, long life and high luminance maintenance free features, the Star 8 Solar Street Light is a winning combination.

The Star 8 Solar Street Light is perfect for residential or commercial use particularly in remote areas or difficult installation scenarios.

The Star 8 Solar Street Light converts sunlight into electricity which is stored in the Li-Fe battery via the controller. The Li-Fe battery ensures that available power for up to 8 days, even during low solar periods. The LED high luminance light will work automatically via the light sensor control. Solar power for street lights ... it just makes sense
